

### Paracetamol + Caffeine

**Please read right through this leaflet before you start using this medicine.**

This medicine is available without prescription, but you still need to use Hedex Extra tablets carefully to get the best results from them.

- Keep this leaflet, you may need to read it again.
- If you have any questions, or if there is anything you do not understand, ask your pharmacist.

**In this leaflet:**

1. What Hedex Extra does
2. Check before you take Hedex Extra
3. How to take Hedex Extra
4. Possible side effects
5. How to store Hedex Extra
6. Further information

## 1. What Hedex Extra does

Hedex Extra can provide extra relief from headache including migraine.

They can also relieve backache, rheumatic and muscle pain, toothache, sore throat, period pain, and relieve the fever, aches and pains of colds and flu.

The tablets contain two active ingredients. Paracetamol is a painkiller and also reduces your temperature when you have a fever. Caffeine acts to further help the effectiveness of paracetamol.

## 2. Check before you take Hedex Extra

- if you have ever had an allergic reaction to paracetamol, caffeine or to any of the other ingredients (listed in Section 6)
- if you are taking other medicines containing paracetamol.

- if you have **liver or kidney disease**, including **alcoholic liver disease**.

Talk to your doctor or pharmacist before taking these tablets if you are taking any prescribed medicines; particularly **metoclopramide** or **domperidone** (for nausea [feeling sick] or vomiting [being sick]) or **colestyramine** (to lower blood cholesterol). If you take **blood thinning drugs** (anticoagulants e.g. **warfarin**) and you need to take a pain reliever on a daily basis, **talk to your doctor** because of the risk of bleeding. But you can still take **occasional** doses of Hedex Extra at the same time as anticoagulants.

Due to the caffeine content of this product **it should not be used** if you are **pregnant or breast feeding**.

### If you take too many tablets

Immediate medical advice should be sought in the event of an overdose, even if you feel well, because of the risk of delayed, serious liver damage.

If your symptoms continue or your headache becomes persistent, see your doctor.

#### 4. Possible side effects

Like all medicines, Hedex Extra can have side effects, but not everybody gets them. A small number of people have had side effects.

**Stop taking the medicine and tell your doctor immediately if you experience:**

- **Allergic reactions** which may be severe such as skin rash and itching sometimes with swelling of the mouth or face or shortness of breath
- **Skin rash or peeling, or mouth ulcers**
- **Breathing problems.** These are more likely if you have experienced them before when taking other painkillers such as ibuprofen and aspirin

- Unexplained bruising or bleeding
- Nausea, sudden weight loss, loss of appetite and yellowing of the eyes and skin.

**If you do get any side effects**, even those not mentioned in this leaflet, tell your doctor or pharmacist.

## 5. How to store Hedex Extra

Keep out of the reach and sight of children.

Do not use this medicine after the 'EXP' date shown on the pack.  
Store below 25°C.
